Lloyd Alba

Round Rock, Texas | 512-992-8499 | lloyddalba@gmail.com | linkedin.com/in/lloydalba | github.com/premiumfriedrice

Education

Texas A&M University College Station, Texas

Bachelor of Science in Computer Science *Anticipated Dec. 2027*

- **Coursework:** Data Structures & Algorithms, Design & Analysis of Algorithms, Database Systems, Computer Systems, Software Engineering, Computer Organization, Programming Languages, Linear Algebra, Statistics I

Technical Skills

Python	Swift	AWS	Docker	vLLM/LiteLLM	ARKit/CoreML
C++	TypeScript	Azure	Kubernetes	LLM agent harnesses	OpenCV
SQL	React/Next.js	Terraform	Linux/Bash	RAG	Databricks/Spark
Go	REST APIs	CI/CD	Git	LLM Evals	PostgreSQL/Supabase

Experience

Agentic AI Engineer Intern | *Fable Innovations* Oct. 2026 – Present

- Deployed on-prem vLLM inference server (FP8 Qwen3-8B) serving 16 engineers' workloads at zero marginal cost.
- Secured with per-app API keys, VPN-only access, ufw, and Caddy TLS via internal CA; no public exposure.
- Built OpenTelemetry pipeline and FastAPI/PostgreSQL dashboard for latency, GPU health, and per-key usage.

AI Automation Intern | *K2United* May 2026 – Aug. 2026

- Saved sales reps 1–2 hrs per account by shipping outreach brief tool backed by 100k-row/day Databricks ETL.
- Built AI enablement intake platform turning employee automation requests into tickets, 7 automations shipped.

Software Engineer Intern | *Arrive Logistics* Jun. 2025 – Aug. 2025

- Fixed recurring failures across 16 CI/CD pipelines with New Relic tagging and Terraform tagging modules.
- Migrated user management service to .NET 8 with New Relic, cutting error detection from days to minutes.

Software Engineer Intern | *Arrive Logistics* Jun. 2024 – Aug. 2024

- Migrated 3 services to YAML CI/CD pipelines and developed pipeline templates for 2 git branching strategies.
- Delivered milestones two weeks early by mentoring two interns on pipeline debugging and cloud deployment.

Code2College Software Engineer Intern | *Arrive Logistics* Jun. 2023 – Aug. 2023

- Cut sprint overhead 14% and saved $38,400/year by automating deployment workflows via a Python CLI feature.
- Reduced setup time from 2 days to under 3 minutes for Kubernetes deployed applications by scaffold automation.

Projects

apted – Resume Tailoring Chrome Extension | *Next.js, Supabase, Fly.io, Stripe, LaTeX* May 2026 – Present

- Cut resume tailoring time from 10 minutes to 30 seconds with a custom LLM tailoring harness.
- Added LLM-as-judge validation and PII scrubbing to catch bad rewrites and protect user data.

AggieDine – Social Dining App | *Python, AWS, React Native* Jan. 2026 – May 2026

- Designed scale-to-zero AWS backend serving up to 70k students at $0 idle and under $25/month at capacity.
- Led 6 backend engineers building a social dining platform for Texas A&M students, running sprint planning.

CORTEX – AR + CV Travel Ecosystem | *Swift, ARKit, CoreML, OpenCV, Node.js* Jan. 2026

- **Won 1st Place Overall** at TAMUhack 2026 (650+ competitors) by building airport travel ecosystem.
- Architected iOS app with AR anchors to relocate set-down items and CV to detect bags on airport carousels.
- Built search and interactive map UI, integrated CoreML/OpenCV models, and deployed backend endpoints.

findMoto – Motorcycle Listing Scraper | *Python, Selenium, Notion API, Regex, Cron* Mar. 2025 – Jun. 2025

- **Won 1st Place Notion API Challenge** at TAMU Computing Society Build4Good Hackathon over 13 teams.
- Built a Selenium scraper that ranks Facebook Marketplace motorcycle listings by price, model year, and recency.
- Processes 40–80 listings daily via cron into a Notion dashboard; used it to source and purchase 2 motorcycles.
